F o r e w o r d

Statistical Office of Kosovo (SOK) has prepared of data on coal production, energy production, energy consumption, energy imports and exports, and oil and gas imports. This statistical publication presents a statistical analysis for the period of 2009.

Sources of data are Kosovo Energy Corporation (KEK) and records from the External Trade Statistics.

Based on continued demands from various internal and external users, and based on indicators of Eurostat which publishes the statistics of energy, we have presented here data of interests.

The purpose of the publication is to highlight the development trend of this sector. We believe that this publication will serve as a useful reference base for all users of SOK statistical data, and will serve as useful and relevant economic information for Kosovo.

For contribution in the preparation of this publication we thank Mrs. Milva Ekonomi, SCB/SIDA long-term consultant in the SOK.

In particular we thank the Kosovo Electric Corporation without whose cooperation this publication would not have been possible.

This publication is the fruit of the work of staff commitment of the energy statistics within the Department of Economic Statistics and National Accounts.

Department Director: Ilir T. Berisha, Bekim Bojku, Arlinda Mataj, Nazmije Belegu and Sulltane Gashi.

Comments, remarks and suggestions regarding this publication are considered as useful.

October 2009

Chief Executive Officer, SOK
Avni Kastrati

Symbols

Q1 - first quarter of the year.

Q2 - second quarter of the year.

DIS – Distribution.

GWh - Unit of measurement for electricity.

MWh - Electricity unit (1GWh = 1000MWh).

13 .Chain change of energy and other energies by months (2002 – June 2009)	29

Production and consumption of coal (January-June) 2009

During the first quarter (Q1) are produced 2.15 million tonnes of coal and during the second quarter (Q2) of 2009 are produced 1.46 million tonnes of coal, or 31.88% less than the first quarter. The amount of coal production for the first half of 2009 (January-June) was 3.61 million tonnes, if the comparison is done with half of the year 2008 we have an increase to 1.55%, and in 2008 were produced 3.56 million tonnes.

As coal consumption for the first half of 2009 (January-June), there are consumed 3.89 million tonnes of coal or 7.5% more than produced¹.

Electricity production in PP& HP (January-June) 2009

During the first quarter (Q1) of 2009 have been produced 1.52 thousand GWh of electricity while during the second quarter (Q2) of 2009 were produced 1.15 thousand GWh of electricity, or 24.76% less than the first quarter. The amount of electricity production in the first half of 2009 (January-June) was 2.67 thousand GWh of electricity, and if it is compared with the half of 2008 there is an increase to 1.55%, which in 2008 were produced 3.56 thousand GWh electricity.

While in the hydropower plants (HP) in the first half (six months) are produced 53.81 GWh where 28.03 in Q1 and 25.78 GWh in Q2 or 8% less than in Q1.

Imports, Export and exchange of electric energy (January-June) 2009

During the first quarter (Q1) and second quarter (Q2) of 2009 were imported 252.28 GWh, in the first quarter (Q1) 201.75 GWh in 2009 were imported 201.75 GWh and in the second quarter were imported 50.53 GWh or 74.95% less than in the first quarter.

In relation to the first half (January-June) of 2008, in 2009 are imported 21.41%, less than in 2008.

But in terms of electricity export we see that the Q1 and Q2 of 2009 were 70.11 GWh of electricity which in Q1 is zero, and Q2 is 70.11 GWh.

In relation to the first six months of 2008, in 2009 were exported 18.19% less than in 2008. Exchanges of electricity in Q1 have been - 34.91 GWh while in Q2 exchanges -30.65, and from this it is seen that there is a decline of 10.44% more in Q2 in relation to Q1 of 2009.

Consumers or costumers 220-110kV

For the period January-June 2009, consumers 220-110kV consumed 224.43 GWh.

In Q1 of 2009, consumers 220-110kV consumed 107.01 GWh where 12.79% of total production was consumed by consumers 220-110kV.

During Q2 2009, the 220-110kV consumers have consumed 117.43 GWh or 9.74% more than in Q1 2009. 16.10% of total production was consumed by 220-110kV consumers.

Losses of electricity

Losses of electricity in the period January-June 2009 have been 1.13 thousand GWh.

In Q1 2009, energy losses were 791.24 GWh or 16.71% more than in Q1 2008, where energy losses were 677.90 GWh.

In Q2 2009, electricity losses were 344.80 GWh or 56.42 less than in Q1 2009, and if compared with Q2 2008, we have an increase to 5.41%.

¹ The rest of the consumption of coal is taken from stocks.

End consumers (final)

End consumers January-June 2009 have consumed 1.34 thousand GWh of electricity, which in Q1 2009 had consumed 731.03 GWh and in Q2 612.39 GWh, where we have a decrease in Q2 to 16.23%.

For the period January-June 2009, industrial consumption was 8.88%, commercial consumption was 19.35%, household consumption has been 66.95% and other public enterprises have consumed 4.83%.

Invoicing in Euros (€)

For the period January-June 2009 the amount of energy billed catch figure of 84.61 million Euros.

Billing for household has a figure of 52.03%, industry 8.60%, 25.00% in commercial, public enterprises and 5.61 and consumers 220-110kV, 8.76%.

Methodological explanations and definitions

² **Electricity** - means the form of energy which is transported through metal conductors.

Energy enterprise - means Electricity Company which carries one or more of the following energy activities: production, transformation, transmission, distribution, supply, trading or disposal of electricity, heat or natural gas under a license issued by the Law on Energy Regulator or without a license if such license is not required.

Production of coal - Represents the amount of coal that is extracted from the mines.

Electricity production - represents the amount of electricity produced in power plants and hydropower plants.

Power generation - implies the generation of electricity, heat or any other form of energy.

Gross energy production - represents all the amount of electricity production in power plants or hydro power plants.

Net energy production - represents the amount of electricity to the brink.

Imports of electricity - represents the amount of electricity purchased outside the state.

Exchanges of electricity - represent the amount of electricity exchanged or produced in the country and abroad.

Losses of electricity - represent the amount of electricity that is lost in transmission and distribution.

Consumer (customer) - means the customer to purchase wholesale or the end (final) consumer of energy.

Privileged consumers (220-110kV) - means any natural or legal person who is free to buy electricity from the supplier to the choice of his / her.

Distribution - means that transport of electricity, heat or natural gas through high voltage lines, medium, or medium-pressure pipelines or low, in order of a delivery to customers, but not including supplies.

Gas - means fuel which releases energy during combustion or other chemical or physical process and that can be stored in warehouses for storage.

Oil and its derivatives - means liquid fuel which releases energy during combustion or other chemical or physical process and that may be stored in warehouses for storage.

² Methodological explanations are taken from the Energy Law No. 2004/8.

1 . Production and consumption of coal

1.1. Production of coal

Tab 1. Production of coal in tonnes and rate of percentage (%) (January – June 2009)

Month / 2009	Production of coal (t)	Production of coal in (%)
January	633.071	17,49

Statistical Office of Kosovo, a brief description

The Statistical Office of Kosovo (SOK) is a professional office operating since 1948. The SOK passed through some of the historic phases and it has been structured by the state rule of that time. SOK restarted its work on August 2, 1999, as an independent and professional office working in the frames of the Ministry of Public Administration (MPA). SOK is financed by the Kosovo Consolidated Budget and by donors for the various projects.

The Statistical Office of Kosovo acts pursuant the UNMIK Regulation 2001/14 that entered into force on July 2, 2001. A medium-term Master Plan is being developed for the statistical system of Kosovo compatible with the European Statistics.

The SOK Organization Structure; composes of four departments for production of statistics (Department of Economic Statistics and National Accounts, Department of Population Statistics, Department of Social Statistics and Department of Agricultural and Environment Statistics), seven Regional Offices (located in Gjakova, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj), two support departments (Department of Methodology and Information Technology, and Department of Administration), as well as the Office of the Population Census.

Total number employees is 134, of them 96 (71.6%) within the SOK offices whilst 38 (28.4%) in regional offices.

There is also a support and cooperation with the international institutions.

The Statistical Office of Kosova covers Kosovo entirely. For implementation of the surveys in the field, the SOK uses appropriate sampling and methodology approach. In the collection of the reports from the reporting units, the SOK engages professionals, technicians, administrators and civilians form the local offices and regional field population census.

Recently, a team of national and international experts is working in the project of the population census.

SOK Mission is to fulfill the needs of the users with the reliable statistical data and with regular analyses in order to support and provide government departments with the proper information for decision-making process including other users as well.
